+923099005383
Lahore, Pakistan

SUMMARY

Full Stack Developer with 3+ years of software development experience building scalable applications and backend systems using Node.js, NestJS, TypeScript, PostgreSQL, Prisma, and Flutter. Strong experience in RESTful API development, authentication and authorization, database design, payment gateways, webhooks, and third-party API integrations. Experienced with AWS, Redis, Git, deployment workflows, and building secure, maintainable architectures. Skilled in delivering end-to-end solutions with a strong focus on performance, scalability, clean code, and seamless user experiences.

EXPERIENCE

Senior Full Stack Developer
Geekybugs | July 2024 - till date

- Develop and maintain scalable backend systems and mobile applications using NestJS, Node.js, TypeScript, PostgreSQL, Prisma, and Flutter.
- Design and build RESTful APIs, database schemas, authentication systems, JWT/session management, RBAC, permissions, and secure API workflows.
- Integrated third-party services including Razorpay, Stripe, Shiprocket, Firebase, Google Maps, Traccar, and external REST APIs, including webhook-based payment and order processing.
- Work with PostgreSQL, Prisma ORM, Redis, background jobs, cron jobs, and API optimization to build reliable and scalable backend services.
- Deploy and manage applications using AWS services including RDS, S3, CloudFront, ECS/Fargate, and Elastic Beanstalk, while supporting staging and production environments.
- Build and maintain cross-platform Flutter applications, integrating APIs, Bloc/GetX state management, real-time tracking, maps, push notifications, and reusable UI components.
- Collaborate across frontend, backend, QA, and client requirements to troubleshoot production issues, improve security, optimize performance, and deliver end-to-end features.

Flutter Developer
TieCodes | Aug 2023 - June 2024

- Developed and maintained production-ready Flutter applications for GPS tracking, fleet management, and location-based services across Android and iOS.
- Built GPS and vehicle-tracking solutions with Google Maps, geolocation, geofencing, route tracking, navigation, and real-time location updates.
- Integrated REST APIs, Firebase, payment gateways, push notifications, and third-party SDKs, ensuring reliable communication between mobile applications and backend services.
- Implemented scalable application architecture and state management using Bloc, GetX, and Provider, with reusable and maintainable components.
- Optimized application performance, API handling, loading times, and battery usage while resolving complex platform-specific Android and iOS issues.
- Collaborated with backend developers and clients on API requirements, feature planning, debugging, testing, and production releases.

Mobile Apps Developer
Sumato Solutions | Jan 2023 - July 2023

- Built cross-platform mobile applications using Flutter and Dart, translating Figma designs into responsive, pixel-perfect interfaces.
- Developed reusable widgets, dynamic forms, date pickers, lists, navigation flows, and application components.
- Integrated REST APIs and third-party services, handled local storage and application state, and resolved Android/iOS platform-specific issues.
- Collaborated with clients and development teams to understand requirements, improve UX, test features, and deliver production-ready applications.

EDUCATION

PUNJAB UNIVERSITY (2018 - 2022)
Bachelor of Information Technology

SKILLS

- **Backend Development: Node.js, NestJS, TypeScript, RESTful APIs, scalable backend architecture, and third-party API integrations**
- **Database & ORM: PostgreSQL, Prisma ORM, SQL, relational database design, migrations, queries, and performance optimization**
- **Authentication & Security: JWT authentication, access/refresh tokens, session management, RBAC, permissions, API security, and rate limiting**
- **Frontend & Mobile: Flutter, Dart, responsive UI development, reusable components, and cross-platform Android & iOS applications**
- **State Management: Bloc, Provider, Riverpod, and GetX for scalable application architectures**
- **API & Real-Time Integration: REST APIs, WebSockets, webhooks, Firebase/FCM, real-time synchronization, and third-party services**
- **Payment Integrations: Razorpay, Stripe, GPay, Apple Pay, payment webhooks, checkout flows, and transaction handling**
- **Cloud & Infrastructure: AWS, S3, CloudFront, RDS PostgreSQL, ECS/Fargate, Firebase, Redis, and Docker**
- **Development Tools: Git, GitHub/GitLab, Swagger/OpenAPI, Postman, CI/CD workflows, debugging, testing, and deployment**
- **Additional Integrations: Google Maps, GPS/Geolocation, Traccar API, push notifications, analytics, QR scanning, social login, and device services**
